

USB Switch

Stoltzen HERA SHIFT USB3.2 Switch

Auto/RS232/GPIO

Product number: SHIFT

Product Description

HERA Shift is a powerful and versatile switch from Stoltzen that allows you to easily share peripherals between two hosts, making it the perfect solution for meeting rooms and collaborative workspaces. With support for USB 3.2 and a maximum bandwidth of 10Gbps, HERA Shift provides a fast and reliable connection for all your devices.

HERA Shift is equipped with a range of control options, including a front panel button, RS232, and GPIO, giving you the flexibility to control your devices in a way that suits you. Additionally, HERA Shift features an auto switch function, enabling automatic switching between hosts.

With its powerful 2A power supply, HERA Shift can provide sufficient power for even the most demanding peripherals, including the latest camera devices. Designed with ease of use in mind, HERA Shift comes with everything you need to get started, including mounting ears, rubber feet, a 4-pin terminal block, an RS232 cable, a DC12V2A power adapter, and a user manual.
